to arrange your
viewing of the
home!

Our Framland Care Home team offers exceptional care and service to all our residents in a safe and friendly environment.

The team work hard to ensure a perfect balance between meeting the individual needs of the residents, while still enabling them to maintain and maximise their independence.

Situated close to the heart of Melton Mowbray, Framland is a beautiful Victorian-era building within an established residential area. The property has thirty spacious, well-lit single bedrooms which are fully furnished, with the majority also having private en-suite facilities. We encourage our residents to bring their own furnishings to personalise their room, making it easier for new residents to settle into their new home.

Residents are also encouraged to explore the large, secure garden or make use of the three separate lounges.

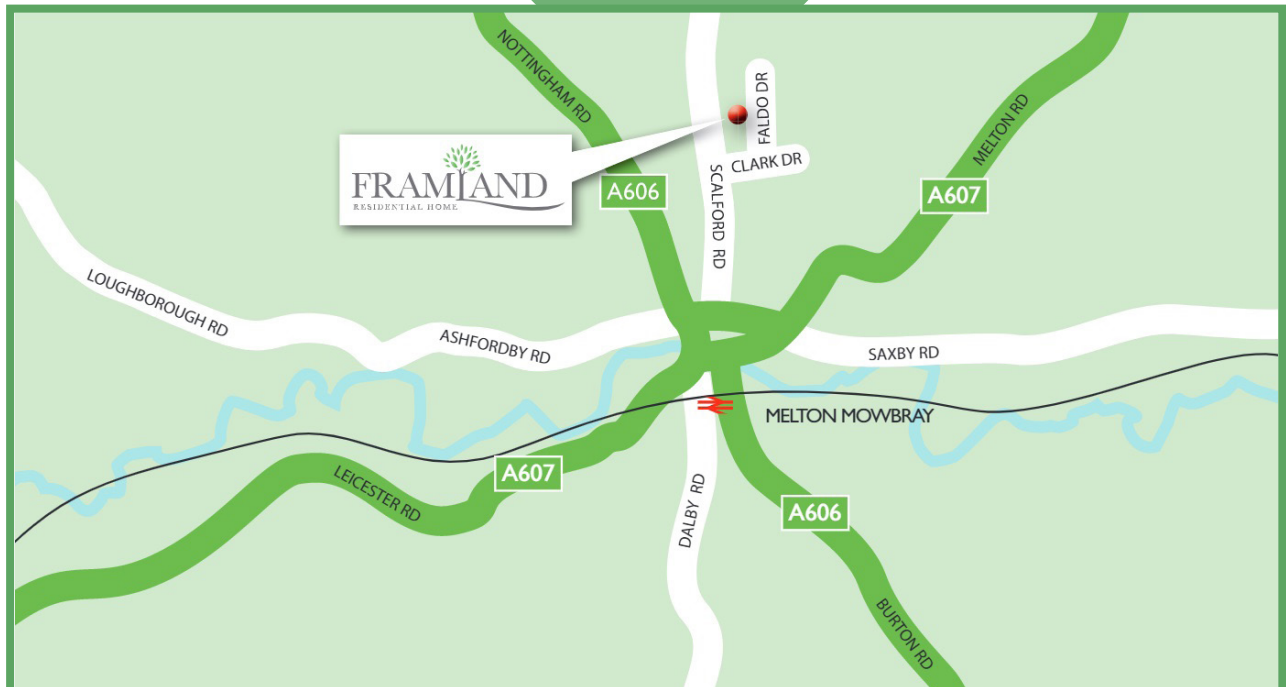

Our Care Philosophy

Our staff aim to uphold the highest standards of holistic and dementia care to all our residents, whilst also encouraging and maximising resident independence. We look to learn as much as we can about our new residents prior to them joining to provide the most suitable environment for them. Making sure all our staff are well-educated on every resident's specific

needs and requirements is vital for providing a safe and secure environment, so we also conduct regular assessments to update residents' personal care plans. Each resident is assigned a healthcare professional who will oversee their general care and make sure their wellbeing is upheld.
